

## User Experience/ User Interface

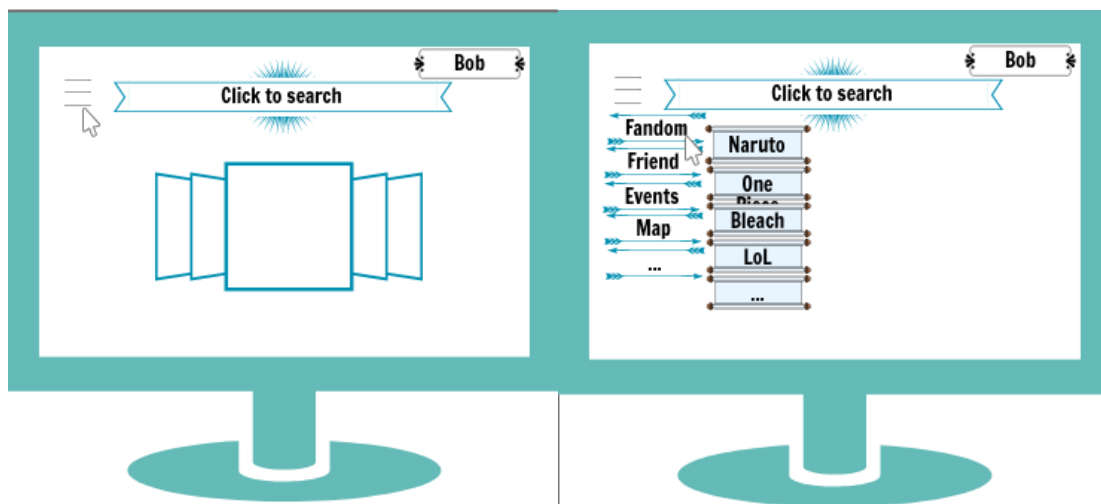

Once entered the website you will encounter the page on the left and users are able to sign in or sign up an account.

To sign in or to sign up you will need to complete the provided form.

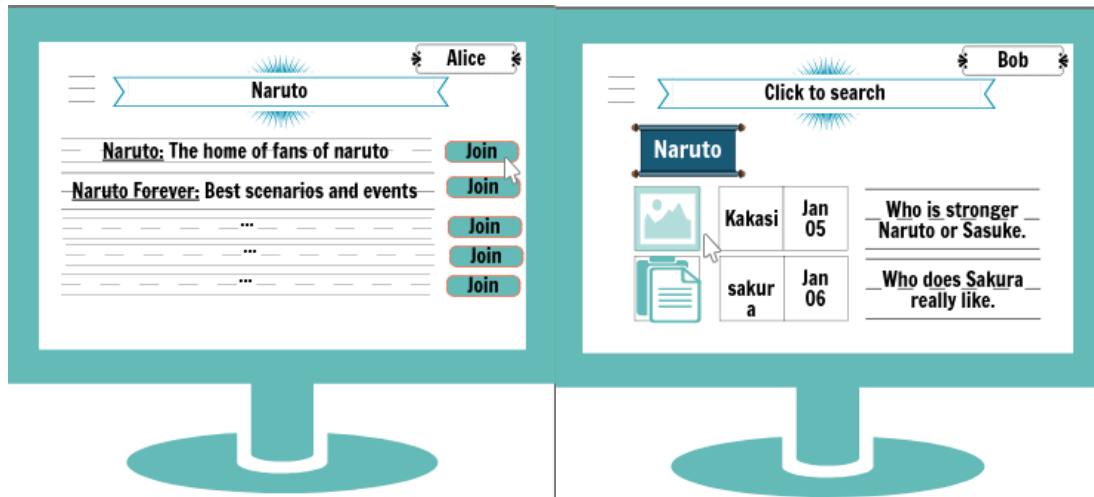

Click the navigation bar to get into more features. It includes fandom, friends, events and others.

On each option in the navigation bar, there are sub-navigations to reach the most common options you use faster.

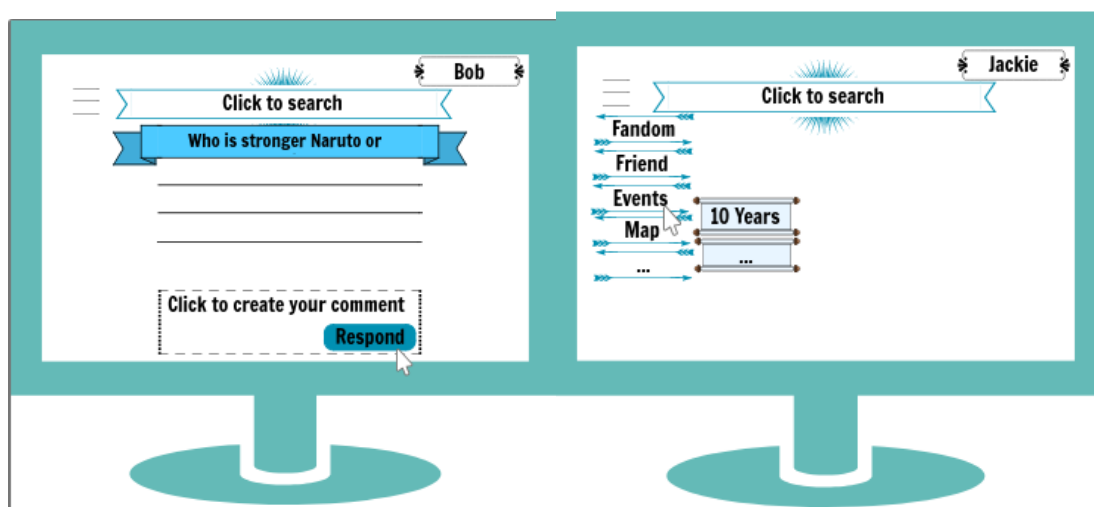

Once you have clicked fandom on the navigation bar you will encounter a list of fandoms and then you could search for the one you like and join them.

Once you have entered the fandom you selected you will see a list of posts published by members of this fandom. You can view a post by clicking.

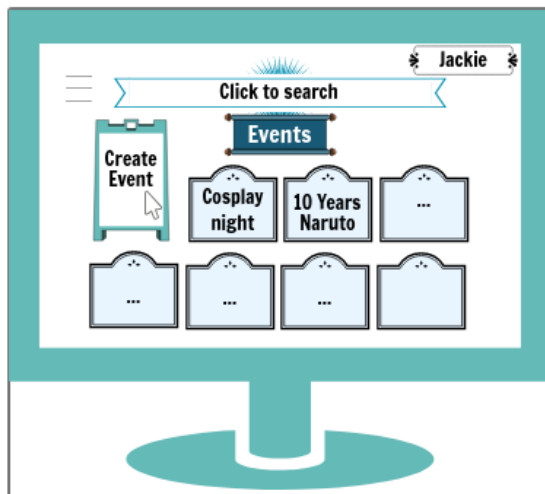

After reading the post you can read comments at the bottom of the post and comment it if you like.

Events button is placed in the navigation bar.

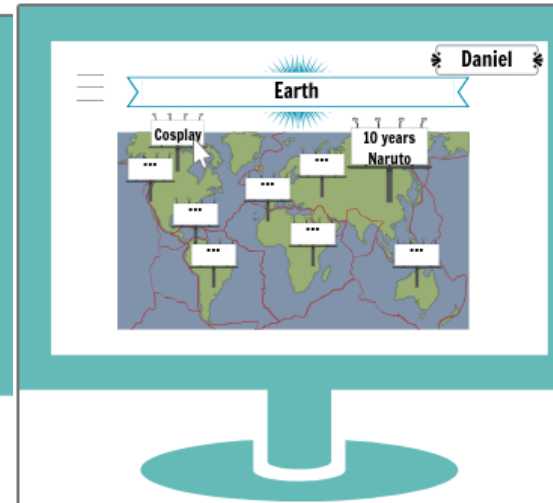

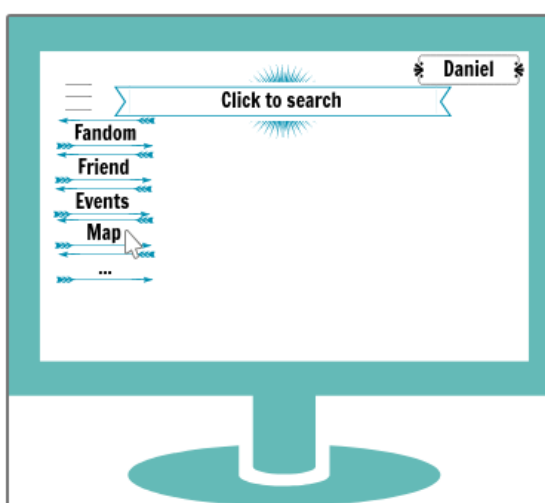

Once you have entered the events page you will have a list of events relative to the fandom you have joined and a button to create an event.

By creating an event you will need to complete a form that includes title, date, location, cost and number of people as well as the summary of the event.

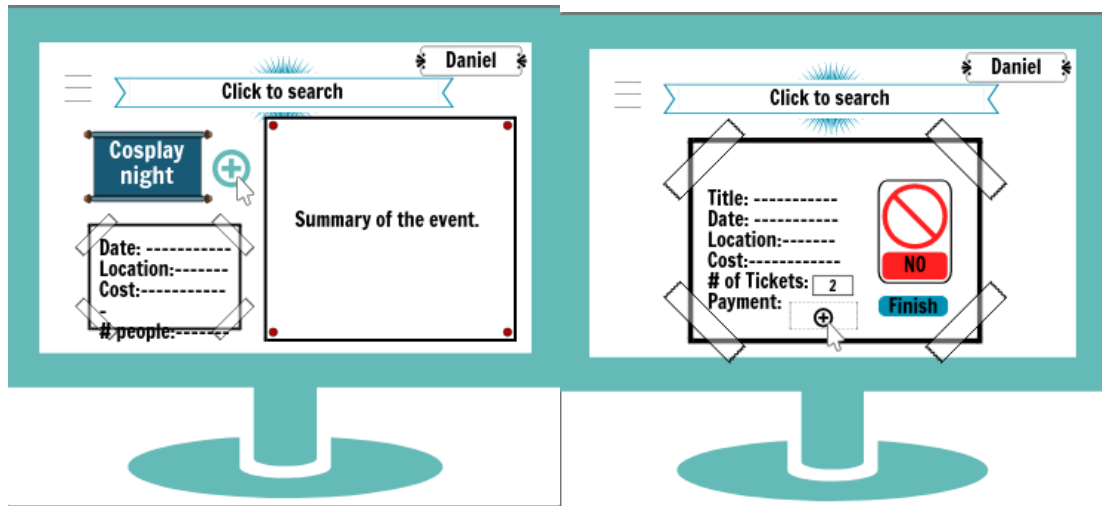

Click on map to see its page.

Searching on maps will display the events nearby the particular place you are interested in. It contains links to the events.

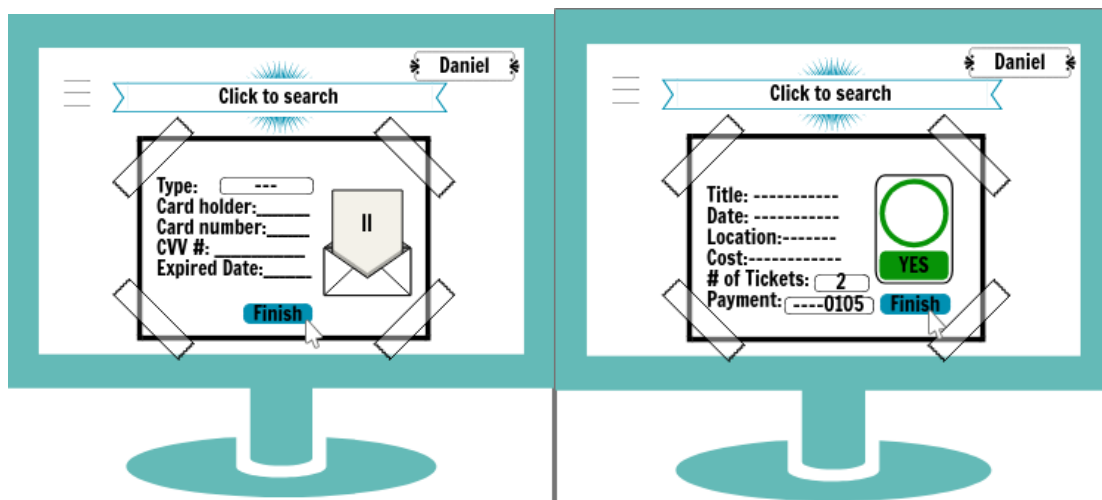

On the page of a particular event their will be information about the event and its summary. There is a button to join to the event.

To join an event you will see the basic information of the event and you will have to choose the number of tickets you want and method of payment.

To add a method of payment you will fill a form in which includes the type of the card, card holder, card number, cvv number and expire date.

Once the form is filled then you should be able to complete the transaction.

When you have successfully registered an event, it will prompt out a message.
